	Chevrolet	Sonic	2013 & Newer	1.4L & 1.8L
	Chevrolet	Trax	2013 & Newer	1.4L

GM did not release a differentiating VIN -

Visual inspection is required before determining the filter fitment for the housing.

- The filter-housing caps are slightly different (see photos on the next page).  
The manufacturer's name is molded on the cap.
- The two filters are different -  
Hengst: The filter does NOT have a valve. The bypass relief valve is in the housing.  
UFI: The bypass relief valve is part of the filter (the spring on the upper cap).
